Chicago History of American Religion

edited by Martin E. Marty

American Religious Thought

A History

William A. Clebsch

Unlike conventional approaches to the story of theology in America, which revolve around doctrinal discussions, this study regards religious thought as "the reasoned, the cogent, and the evocative consideration of ways in which the human spirit of Americans seriously and strenuously relates itself to nature, to society, and to deity." Accordingly, the author focuses on three men who shaped the American spirit--Jonathan Edwards, Ralph Waldo Emerson, and William James.

Dissent in American Religion

Edwin Scott Gaustad

Professor Gaustad views religious dissent as essential to the character of the American religious experience and as standing in profound disagreement with society's orthodox values and beliefs. He divides dissenters into three general types: Schismatics, Heretics, and Misfits. After exploring each category, Professor Gaustad contrasts the unique character of American religious dissent with the dissenting tradition found in Europe.

Systematic Theology

Volume One

Paul Tillich

In this volume, Tillich presents the basic method and statement of his "correlation" of man's deepest question with theological answers.

"The reading of **Systematic Theology** can be a great voyage of discovery into a rich and deep, and inconclusive and yet elaborated, vision and understanding of human life in the presence of the mystery of God. . . . a noble, a profound, closely reasoned integrated presentation of the greatest theme in life." --H. Richard Niebuhr, **Union Seminary Quarterly Review**
